

210-NEM-NJ Supplement
PART NJ503 – Safety
SUBPART A – Engineering Activities Affecting Utilities

NJ503.02 General Considerations

(e) The procedures in Part 503, Subpart A or as herein amended will be followed in New Jersey. The district conservationists are responsible for carrying out the policy of 503.02(b) in their counties under all programs, except for projects installed under federal contract. For projects installed under federal contract, the contracting officer or their technical representative is to be responsible for informing contractors of clauses regarding damage to existing utilities.

NJ503.06 State Laws

Procedures of Part 503.04 are superceded by State Law. All construction drawings for activities involving excavation shall include a note informing the landowner, operator, sponsor, or contractor of their responsibility to notify the Garden State Underground Line Locating Service prior to any land disturbance. The note shall appear on the first sheet of the drawing set or in the construction notes.
